is the only example so far of a fully encrypted messaging service on Facebook. However, the main difference with WhatsApp is that Telegram users are required to use the browser extension. When you try to download Telegram Desktop onto your Mac or Windows computer, a huge error message appears saying that the version is too old and that you need to update. "It turned out that it had been made with a library built in 2012 and the feature that Facebook wanted to control was not implemented yet," Shtylman said. Even with the 2017 update to the iOS version of Telegram and the 2016 release of the Android version, the company has deliberately kept the app in beta until it ships. Barely usable for most users, Telegram is one of the most widely used and well-respected messaging apps on the planet, even if many users are worried about the potential impact of the data they submit to the company. "The 'killer feature' of Telegram is that all your data is end-to-end encrypted. You can't see what any user has sent or received. And messages are stored for a long time in encrypted form," says Harald Haas, Head of IT Security Research at Qihoo 360 Technology. "That means if your phone gets stolen, the thief can't see what you have sent or received. But to achieve all that, you have to trust Telegram," he told Threatpost. The use of an encrypted messaging service like Telegram would make for an ideal target for the Facebook-owned WhatsApp to someday, especially if WhatsApp were to turn out to have secretly collected user data. Facebook's data-leaking past is one reason why governments in countries such as Brazil, India and, more recently, Europe, are turning their attention towards its biggest subsidiary, WhatsApp, and its parent, Facebook, in the same way they once turned their attention towards Google and Microsoft in order to ward off spying and data collection. But WhatsApp, already the company with the third most active users on iOS, has yet to take a global leadership position. "WhatsApp has always been subject to the same surveillance and legal vulnerability that Facebook has been," Harald Haas added. "If you look at what happened in Brazil – the investigation and indictment of former President Lula – Facebook really came under close surveillance by the G8-owned company that is WhatsApp

Text effects are added as layers, so you can control how much of the effect to apply and how transparent you want it to be. The most common text effects are Perspective Warp, Glow, Pattern, Bevel & Emboss and Drop Shadow.
