Autodesk MAXON is the other major supplier of visual effects (VEX) software. MAXON produced a number of VFX apps for desktop computers over the years, and acquired software developer Corel V-Ray 3D in 2014. Both Autodesk and MAXON were acquired by the Japanese company to form Autodesk Media & Entertainment (AME) in 2009. AME is also responsible for Autodesk 3ds Max, formerly known as 3D Studio Max, a 3D-modeling, animation, and rendering program. Autodesk media & entertainment In September 2014, Autodesk announced the acquisition of Japanese media technology company Media and Entertainment (M&E) for an undisclosed amount. M&E was created in 1989. According to press releases, M&E is a software business, operating primarily in Japan and Europe, as well as the United States. Its products include media workstation software for multimedia creation, as well as digital film and television tools, and integrated 3D workflows for 3D, game engine, and animation production. M&E was founded as Media and Research, which was acquired by the Italian company Embraco in 1996. Embraco was acquired by Dais in 2000, which was in turn acquired by Embraco's parent company Sumitomo in 2003. Autodesk first acquired M&E in 2009. When the merger is completed, the combined entity will be called Autodesk Media and Entertainment, headquartered in San Rafael, California, with over 9,000 employees. Autodesk's acquisition of M&E allows Autodesk to offer a broader range of creative software solutions to customers. The combined organization will have a significant global presence, with offices in Australia, China, France, Germany, Italy, Japan, Korea, Singapore, Spain, Sweden, Switzerland, the United Kingdom, and the United States. M&E and Autodesk 3ds Max M&E's 3ds Max software (originally known as 3D Studio Max) is a 3D modeling, animation, and rendering program released by M&E in 1989 and then by AME in 2009. It was originally developed by Maxon Computer Graphics, a division of Maxon Computer Graphics GmbH. Its source code is now shared by the official 3ds Max development team. Maxon purchased Autodesk's VFX software division in 2009. Maxon
