What's New Version 1.6: - Fixed a small bug that occurred sometimes when the clients joined the Group. - You can now change the start date for the counter in the menu.Q: Replace string from a list I have a list mylist = ["Dates", "2017-06-01"] and a sentence example = "I have the following dates - 2017-06-01"

What I want is to use mylist and example and replace the dates from mylist into the sentence, to get this output: "I have the following dates - 2017-06-01" I don't know how to do this. Any help would be appreciated. A: You can use str.replace and map the list to new list, then join them back: `import re mylist = ["Dates", "2017-06-01"] example = "I have the following dates - 2017-06-01" result = re.sub(r'\b(' + '|'.join(mylist) + r')\b', r'\g \g', example) print(result)` Prints: I have the following dates - 2017-06-01 Category: Murals Coming up quickly, there will be more information on the new murals that will be revealed in the next week or so, but for now, here's a look at the mural that was displayed in the hallways during last year's CMT Music Awards. Sylvia "Crazy Horse" Franklin, renowned artist and author is a native of Greenville, SC and was raised in the Bronx. Her artwork [77a5ca646e](#)

RampUp Footfall Counter [Mac/Win]

RampUp Footfall Counter is a powerful tool for the business owners who need to count the number of customers that comes to a certain location. You can use the program to analyze the images sent by a local or remote camera in order to count the number of persons. The program can use network or online camera feeds and allows you to change the direction of the counter in order to match the location configuration. A report with the customer count can be sent to your email address with just one click. In the case of Windows C# projects, you can install a program using Publish from Visual Studio for a Visual Studio Website. How to install an application in your Visual Studio Website: 1. In the Installed Programs view, click Add New on the toolbar. 2. In the Installed Programs view, you see the Installed

Windows C# Projects dialog box. 3. Click the Open button. 4. In the Open dialog box, locate and select the .NET Framework 4.0 folder, and then click Open to select it. 5.
