Become a mighty player with a huge "ticket" of good luck. Fight your way through a series of large card tournaments on the way to the next arena. To get there you need to defeat a series of opponents in the tournament, and the winner will get the title of "the best player of Blackjack". As you play, you will collect new cards of your favourite heroes and magic-wielding characters. Their perks will enable you to use more effective or offensive cards, or help you win more important rounds of the game. Throughout the game, you can change your cards and stats. For this, you will need in-game currency, which you can purchase during play, and, of course, money, which you get to invest in the first game. If at the end of a tournament you are not satisfied with the current cards, you can change your deck by buying new ones, and it's also worth mentioning that the appearance of cards may be affected by your skill level. At the end of the game, you will face the final fight of a large tournament. The goal of this final duel is to get a prize - a large gold coin, which will be thrown out of a special chest. Black Jack Story will offer you a series of large single-player tournaments, to win the title of champion and to get the ultimate prize of this game. But keep in mind that no success is guaranteed - if you play really well, you can lose in any round!
