The family Anguillidae contains only eels. Eels and the other members of the Anguilliformes are sometimes separated as the order Anguilliformes, while others as suborder Anguilloidei, which have no other orders. Anguilliformes contain about 27 known families. Eels are generally slender, dark fish, with elongated bodies, long dorsal fins and tail fins with a spineless ray. Anguilliformes include (some classifications may vary): - Eels and their allies Clupeiformes, which includes herring and shads. - Anguilliformes, which includes eels and their allies (the latter are not classified as an order). Eels are divided into two groups, synbranchii which includes common or American e 6d1f23a050
