Thank you for your support.Bitter Melon Bitter Melon is a band that is a fusion of many musical styles and genre of music. The band has been put on many stages in the United States and has played for many festivals. The band has also been a part of the underground and surf rock scene in the United States. Bitter Melon began in 1988 as a side project of singer-songwriter John Wardle, best known as the lead singer and songwriter for Chicago indie rock band Slant 6, and frequent collaborator with Kevin Devine. After a stint in indie rock with bands like the Stretchys and Eunuch, Wardle began to sing on the side, inviting friends to sing harmonies in various styles. Most notably, Pete Katona of Jets to Brazil, Rich Gilbert, and Bob Phillips of the Ohio ska band Cats in Space. This became the nucleus of Bitter Melon, which would be the foundation for numerous live collaborations with DJs and other artists. Eventually, the bands were first rehearsed in Wardle's own living room before hitting the road. Bitter Melon has been called a punk-to-metal band, blending many different styles including reggae, ska, ska punk, indie rock, and hardcore punk into one cohesive sound. What's New in the Custom Addressbook?

The CleanLook Professional Address Book is a simple to use program that enables you to create a series of contact sheets, that you can store in a secure place. The application allows you to import contacts from a local file or manually create the individual profile. You can sort the contacts according to your relations to them: home, office, club or general. A large number of contact details are displayed in the contact list view, grouped by categories. Display the contacts on the contact list view in the following order: - Name - Address - Phone, fax - Email - Web site, URL Customize the contact list by - Sorting the contacts by Name - Assigning special fields to each contact - Altering the contact list view You can easily import your contacts from any CSV, text or.TXT file. Import the contacts from the local file or from Internet browser history. Export the contacts in any format. Store the contacts in a secure database-like structure. Password protection for your address book. Customize the address book by editing contact fields. Automatically fill the contact data using the web browser. Add, edit and remove contacts using the contact list. Powerful searching engine for your address book. Can be used in the following programs: CleanLook Home/ CleanLook Office/ CleanLook Club/ CleanLook eGroups/ Included is a user manual that you can read from any Windows application. The application is extremely easy to use. You can import contacts from local files. You can export contacts to text, CSV or HTML files. You can import or export a fragment of the contact list to a secure database-like structure. You can create backup files, so you can make a copy of your data. You can remove the dummy fields from the imported data. You can set a password to protect your contact list. Easily create contact sheets Custom Addressbook allows you to manually create entries for each contact or simply import them from local files. The supported formats include.TXT,.CSV and.ASC as input. You need to specify which category you wish to send the contacts, as well as filters for import: filed separator, text qualified and address book columns. The data you can enter includes names, companies, business phone numbers, home numbers, fax, emails, URLs, contact addresses, city and comments. If the source file does not contain all these columns, you may easily de-select them, so they can be ignored in the import process. Similarly, you may add or remove dummy fields in order to facilitate the import. Password protection for your address book Custom Addressbook allows you to create a secure storage space for important contacts. This is why the software allows you to set a password in order to restrict the access to the contacts list.

System Requirements For Custom Addressbook:

OS: Windows 7 or later (64bit Windows 7, Windows 8.1, Windows 10) Processor: Intel Core i3, AMD Athlon64, or better Memory: 4 GB RAM Graphics: DirectX 9 compatible graphics card with 2 GB RAM DirectX: DirectX 9.0c compatible with graphics card Storage: 15 GB available hard drive space Sound: DirectX compatible sound card Networking: Ethernet or better broadband Internet connection A DVD drive (DVD 9 compatible) is required for installation For more
